

# ERIK BREDE

- PHOTOGRAPHER -

## PROFILE

Erik Brede is a photographer and Photoshop artist, born in 1971 in Svolvaer, Lofoten Islands, Norway.

His photography journey started at the age of 11 when his father introduced him to the great magic of film development and post-production in his low budget darkroom. Even if the old analog darkroom is replaced by Photoshop and Lightroom, his vision and creative ideas are the same.

With a conceptual approach, Brede tries to approach a wide scale of subjects in a multi-layered way to produce a link between the landscape's reality and that imagined by its conceiver. These works focus on concrete questions that determine our existence.
